AUDIT TYPE:

Announced Audit

AUDIT EXECUTIVE SUMMARY:

A 190,000 sq. ft Walnut facility. Two lines were observed. In shelled walnuts are packed. Walnuts are received and fumigated then sized and sorted and bagged, and shipped. Kernel Line: Shelled walnuts are brought into the facility by an elevator and dumped onto the sheller. The walnuts are mechanically sized, and then mechanically cracked, sliced and mechanically sized using shaker decks and size punch holes. Any remaining shell is then removed and separated from the kernels. Kernels are sized again into, e.g., halves, pieces, and toppings. Two metal detectors were observed working properly. The scope of this audit includes a visual inspection of the facility and a revision of the food safety records.

Addendum(s)/Module(s) included in the audit:

Not Applicable

Product information for each product

Product Group/Product Name	Observed Product	Seasonality	Country of destination for product
Walnuts	Observed on the day of audit	From: December To: March	United States
